## Commentary on the unaudited results for the period ended 30 June 2022

Group position 12-month performance

During the 12-month period ending 30 June 2022, the Bank saw a recovery from the adverse effects of the COVID-19 pandemic, mainly in the form of a greater demand for financing activities, which resulted in a growth of R1,42 billion, or 27,5%, in advances and other receivables. The growth in the deposit book stabilised in 2022 and, coupled with the increased demand in our advances business, resulted in less funding being available for investment in equity finance and mudaraba deposits. Equity finance and mudaraba deposits have, therefore, seen a decline of R1,49 billion, or 54,9%, during the 12-month period ending 30 June 2022. While the Bank's deposits remain flat, the reducing equity balance, resulted in higher regulatory balances.

Aligned to capital management initiatives, the Bank disposed of an investment which resulted in investment securities reducing by R10,20 million, or 37,5%, during the 12-month period ending 30 June 2022. Deferred tax liability decreased by R9,85 million, or 80,5%, due to movements in temporary differences relating mainly to fixed assets, impairments, disposal of investments and Ijarah financing. In December 2021, the Bank closed the Rosebank branch, which has resulted in a decrease in the lease liability and corresponding decrease in the right of use asset.

Six-month performance

For the six months ended 30 June 2022, the advances book increased by R831,10 million, or 14,4%, whilst the deposit book remained relatively flat for the corresponding period.

The significant improvement in advances is due the recovery in economic activity, as well as the Bank's efforts to grow the advances book.

With an increase in profit rates and growth in the advances book, income from advances increased by R20,78 million, or 10,8%, compared to the same period last year. However, with the decrease in equity finance investments and mudaraba placements, the respective income decreased by R14,95 million, or 31,3%. There has been an increase in credit impairments in the current year of R9,30 million, due to changes in the economic climate and the growth of the advances book which, when compared to the release of impairments in the prior period of R10,17 million, resulted in a R19,47 million, or 191,5%, increase compared to the same period in 2021.

After taking this into consideration, along with sharing with depositors, net income from funding activities decreased by R2,95 million, or 2,3%, year-on-year. In addition, the Bank's non-funding income has increased by R6,95 million, or 33,7%, primarily due to an increase in transaction fees, an improvement in the unit trust markets that generated improved income compared to the previous period and the lifting of travel restrictions, which resulted in an increase in forex business. Operating expenditure increased by R7,22 million, or 6,2%, year-on-year. Management is applying significant effort in identifying solutions to further reduce costs. After consideration of the above, the net effect is a decrease of R0,16 million, or 0,7%, in total comprehensive income in 2022, compared against the same period in 2021. This has resulted in basic and diluted earnings per share decreasing by 2,1% for the same period.

Management is confident that the Bank will continue to be profitable in the 2022 financial year.

It can be seen from the easing of the COVID-19 regulations and the recovery of the economy before accounting for the change in credit impairment, that there is a positive impact on the Bank's year-on-year results. Given the recovery seen during the six-month period ending June 2022 management remains optimistic that performance will improve during the next six months, to the end of the year.

Additional disclosure requirements in terms of regulation 43 of the Bank's Act may be accessed via the Bank's website, being: www.albaraka.co.za, which is published in line with regulations.
