FUND OBJECTIVE

The investment objective of the Old Mutual Global Islamic Equity Feeder Fund is to maximise total return for investors by primarily gaining exposure to the Old Mutual Global Islamic Equity Fund. This Fund offers investors exposure to a broad spectrum of Shari'ah compliant global equity securities. The Fund shall not make investments in companies that conduct its core business in Shari'ah prohibited activities. Such activities include (but may not be limited to) conducting business in relation to alcohol, entertainment (pornography, gambling, etc) non-halaal related products, weapons and companies whose source of income is generated by interest. The Portfolio adheres to the standards of the Accounting and Auditing Organisation for Islamic Financial Institutions (AAOIFI) as interpreted by the Shari'ah Supervisory Board.

WHO IS THIS FUND FOR?

This fund suits investors seeking long term capital growth in an ethical, diversified investment through exposure to Shariah compliant developed market equities. These investors can tolerate stock market and currency volatility.

INVESTMENT MANDATE

Apart from assets in liquid form and exchange rate swaps, the fund only holds participatory interests in the Old Mutual Global Islamic Equity Fund which primarily consists of securities approved by the Shariah Supervisory Board. Only derivatives structured in a shariah compliant manner may be used for efficient portfolio management purposes.

REGULATION 28 COMPLIANCE

The fund aims to offer exposure to a specific asset class. It holds a higher allocation to both international assets and equities than what is allowed in terms of Regulation 28 of the Pension Funds Act. This fund is therefore not Regulation 28 compliant.

Relative to the end of 2024, the first quarter of 2025 marked a significant reversal of market expectations, as trade tensions dominated market sentiment after the Trump administration implemented wide-ranging tariffs targeting China, which extended to the US' traditional allies. US markets struggled, with the S&P 500 falling 4.6% and NASDAQ declining 10.4% in dollars, its worst start since 2018. US economic data showed cooling trends, with the Atlanta Fed GDPNow projecting a US real GDP quarter one contraction of 2.8% at the end of March.

In contrast, European and Chinese markets showed strength, with Europe and China up 10.7% and 15.0% (in dollars) year-to-date, respectively. Fiscal stimulus emerged as a surprise catalyst for European markets, as Germany announced a €500 billion infrastructure fund and increased defence spending, breaking previous fiscal rules. China also implemented stimulus, including wage increases for government workers and expanded consumer programmes. Noteworthy was that emerging markets outperformed developed markets for the first time since 2017, with the quarterly return of MSCI EM of

+2.4% outpacing that of MSCI World, which delivered -2.1% (in US dollars).

Volatility in the global tech sector intensified when Chinese AI startup DeepSeek released its cost-effective language model, triggering concerns about AI pricing. NVIDIA shares plunged approximately 20%, spreading weakness across the semiconductor sector.

Commodities emerged as top performers over the quarter, with gold breaking through US\$3 000 to reach historic highs (+19% year-to-date). Copper gained 25% in quarter one, while Brent crude rose to US\$77.2/bbl. The US dollar weakened significantly with DXY down 3.2% in March, as the euro strengthened 4.3% on fiscal stimulus announcements.

The top sector contributors to the fund's outperformance were the underweight in information technology and consumer discretionary. The contributors to alpha within these sectors were the overweight in Vtech Holdings Corp and the underweight in Tesla respectively. In contrast, the overweight in healthcare and underweight in consumer staples detracted from performance, specifically within these sectors, the overweight exposure to Novo Nordisk and underweight to Procter & Gamble respectively.

The fund's objective is to only invest Shari'ah-compliant equities, which are approved by the Shari'ah board. The fund employs a systematic approach to investing and has positive exposure to businesses with Quality, Value and Growth characteristics, and delivers returns by maintaining and capitalising on these risk premia over time.

As a result, the fund is underweight the US and underweight tech, specifically the Mag7, and has an overweight exposure to the communication services sector. The fund's beta and risk are lower than the benchmark (ex-ante). Moreover, our inhouse Macro-Economic indicators hover within 'Slowdown' territory due to the recent PMI print; therefore, we remain cautious about global growth. Historically value outperforms growth, and defensive sectors do better in a slowdown. Therefore, the fund's exposure to defensive value should hold up. We have mentioned previously that the sky-high optimism regarding US exceptionalism warrants caution and, moreover, a quality portfolio. The fund's dominant style exposure is to quality, which is more defensive and should hold up well in an environment of higher volatility and uncertainty. Buckle up, we have been here before. Investing is a long-term game.

OTHER INVESTMENT CONSIDERATIONS

ONGOING

| | Class A | Class B1 |
|---------------------------------|---------|----------|
| Annual service fees (excl. VAT) | 0.80% | 0.45% |

Please note: Class B1 is available through investment platforms such as Old Mutual Wealth.

The fee is accrued daily and paid to the management company on a monthly basis. Other charges incurred by the fund, and deducted from its portfolio, include audit, custodian and trustee charges and service fees of collective investment schemes in which the fund holds interests. These are included in the TER.

| Total Expenses (Incl. Annual Service Fee) (31/12/2024) | 36 Months | | 12 Months | |
|--|-----------|----------|-----------|----------|
| | Class A | Class B1 | Class A | Class B1 |
| Total Expense Ratio (TER) Incl. VAT | 1.78% | 1.37% | 1.78% | 1.37% |
| Transaction Cost (TC) | 0.13% | 0.13% | 0.13% | 0.13% |
| Total Investment Charge | 1.91% | 1.50% | 1.91% | 1.50% |

Please note: Class B1 is available through investment platforms such as Old Mutual Wealth.

TER is a historic measure of the impact the deduction of management and operating costs has on a fund's value. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER, which includes the annual service fee, may not necessarily be an accurate indication of future TERs. Transaction Cost (TC) is a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

DISCLOSURES

We aim to treat our clients fairly by giving you the information you need in as simple a way as possible, to enable you to make informed decisions about your investments.

- We believe in the value of sound advice and so recommend that you consult a financial planner before buying or selling unit trusts. You may, however, buy and sell without the help of a financial planner. If you do use a planner, we remind you that they are entitled to certain negotiable planner fees or commissions.
- Investments in unit trusts should ideally be a medium- to long-term strategy that takes cognisance of the Recommended Investment Term of each individual fund as stipulated in its Minimum Disclosure Document. A fund's or an investment strategy's ability to provide benchmark performance, or to achieve its performance target over its Recommended Investment Term on a net of fee basis may be impacted by market illiquidity, differences in fund and market pricing points, concentration risk and other local (and where applicable global) events, such as market- and political developments, macro-economic factors and healthcare risks such as Covid-19, amongst others. Your fund value may therefore go up or down and the investment capital or return on your investment is not guaranteed. How a fund has performed in the past does not necessarily indicate how it will perform in the future.
- The fund fees and costs that we charge for managing your investment are disclosed in this Minimum Disclosure Document (MDD) and in the table of fees and charges, both of which are available on our public website or from our contact centre.
- Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained, free of charge, from Old Mutual Unit Trust Managers (RF) (Pty) Ltd, from our public website at www.oldmutualinvest.com or our contact centre on 0860 234 234.
- Our cut-off time for client instructions (e.g. buying and selling) is at 15:00 each working day for all our funds, except for our money market funds, where the cut-off is at 12:30.
- The valuation time is set at 15:00 each working day for all our funds, excluding our money market funds which is at 13:00, to determine the daily ruling price (other than at month-end when we value the Old Mutual Index Funds and Old Mutual Multi-Managers Fund of Funds range at 17:00 close). Daily prices are available on the public website and in the media.
- Unit trusts are traded at ruling prices, may borrow to fund client disinvestments and may engage in scrip lending. The daily ruling price is based on the current market value of the fund's assets plus income minus expenses (NAV of the portfolio) divided by the number of units on issue.
- Excessive daily withdrawals from the fund may place the fund under liquidity pressures. In such circumstances a process of ring-fencing of withdrawal instructions and/or managed payouts over time may be followed.
- This fund holds assets in foreign countries and therefore it may have risks regarding liquidity, the repatriation of funds, political and macroeconomic situations, foreign exchange, tax, settlement, and the availability of information.
- A feeder fund is a portfolio that invests in a single fund which levies its own charges. This could result in a higher fee structure for the feeder fund.
- The Net Asset Value to Net Asset Value figures are used for the performance calculations. The performance quoted is for a lump sum investment. The performance calculation includes income distributions prior to the deduction of taxes and distributions are reinvested on the ex-dividend date. Performances may differ as a result of actual initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Annualised returns are the weighted average compound growth rates over the performance period measured. Performances are in ZAR and as at 31 March 2025.
